EMILIANO ZORN

Head of Training | IT Security Engineer (SIEM / XDR)

Mar del Plata, Argentina | zornemi@gmail.com | linkedin.com/in/ejzorn | emilianozorn.com

ABOUT ME

I am a systems and security engineer with more than 15 years of experience in IT and cybersecurity. My career began in technical support and in network and systems administration, looking after infrastructure for a public organisation and for a global hosting provider. From there I specialised in SIEM and security, moving through customer support and pre-sales to lead an education function today. Along the way I have combined hands-on technical work (Wazuh SIEM/XDR, AWS, Linux, automation) with an interest in teaching, program design and helping teams grow. When a tool does not exist yet, I like to build it.

KEY ACHIEVEMENTS

- Lead and support teams across different divisions, helping instructors grow through hiring, certification and coaching for the Essential and Advanced courses.
- Designed Wazuh Academy, the company education platform, built for around 600 learners per year with room to grow to 2,000.
- Created the Training Console for Instructors, an internal application connected to Jira, Salesforce and n8n.
- Grew from support engineering to pre-sales leadership and then to the education area, covering catalogue strategy, curriculum, delivery, certification and reporting.

PROFESSIONAL EXPERIENCE

Wazuh Inc. | Remote (Argentina)

Head of Training 2024 – Present

- Lead the Training area from end to end: catalogue strategy, course design, delivery calendar, instructor enablement, tooling, platform and reporting.
- Work with teams across delivery, lab environments, content development and client communications.
- Design and maintain Wazuh Academy and the instructor tools that support the Essential and Advanced courses.

Pre-Sales Team Leader 2023 – 2024

- Led the organisation, administration and daily work of the pre-sales team.
- Prepared and delivered product demonstrations, customer calls and proofs of concept based on real use cases.
- Delivered tailored training with the official company courses, which later grew into the Training area.

IT Security Engineer, Support Team 06/2021 – 2023

- Helped customers deploy, fine-tune and maintain the Wazuh platform.
- Resolved tickets with care and within contractual SLA response times.
- Took part in design tasks and suggested product improvements.

Olavarría Town Hall | Argentina

Senior Systems Administrator 01/2011 – 05/2021

- Supported the IT infrastructure of a multi-site public organisation with more than 1,500 employees, connected through a municipal optical fibre network.
- Configured and maintained Windows and Linux servers, including the network and server environment of the city Monitoring Centre.
- Administered a critical Windows Server environment, user accounts, antivirus coverage and backups across several locations.

Earlier roles

Network Administrator (Consultant), Nuzzar 01/2018 – 01/2019

- Supervised network expansion projects across optical fibre and wireless technologies.

Functional Analyst, EDI, NZ Fruits Ltd (New Zealand) 2017

- Worked as the link between the client and the technical team, following the production chain through Azure-based management software.

Support Staff Team, Hostinger Group 2015 – 2017

- Resolved hosting, VPS, domain and billing issues, and debugged customer code in PHP, MySQL and HTML.

TECHNICAL & LEADERSHIP SKILLS

Security: Wazuh (SIEM/XDR) deployment, tuning and troubleshooting; log analysis; rule and decoder design; endpoint threat-detection use cases; proofs of concept

Cloud & Infrastructure: AWS (EC2, Route 53, ECS Fargate, IAM); Terraform; Linux and Windows Server administration; networking (fibre, wireless, Cisco)

Automation & Development: n8n; Python; Bash; HTML/CSS; PHP; MySQL; Git; REST API design; Sphinx/reStructuredText

AI & Agentic Tooling: Claude and Claude Code for development and content workflows; multi-agent orchestration; functional specification authoring; LLM cost modelling

Education & Instructional Design: Curriculum and syllabus design; hands-on lab authoring; certification tracks and assessment; LMS architecture; instructor enablement

Leadership & Program Management: Hiring, coaching and feedback; roadmap and effort estimation; stakeholder management; client scoping and executive presentation

EDUCATION & CERTIFICATIONS

AWS Certified Cloud Practitioner Amazon Web Services, 2023

CCNA, Cisco Certified Network Associate Cisco, 2019

Bachelor's Degree in Information Technology Universidad Tecnológica Nacional (UTN), 2019

Systems Analyst Instituto Superior de Informática Virasoro, 2016

ONTI 2.0 / Big Data INAP, 2015
